"Get Well" cards were sent to: James Strawn (shoulder surgery) and Marlon Dixon. *For each new morning with its light, For rest and shelter of the night, For health and food, For love and friends, For everything Thy goodness sends. Ralph Waldo Emerson (1803-1882)* "Sympathy" cards were sent to: Patricia Buchanan (loss of son), the family of Leonard Hummel (his passing in December). *"Blessed are those who mourn, For they shall be comforted." President's Corner: Happy New Year! The first important event for our chapter will occur on Monday, February 23rd when we go by chartered bus to Atlanta to lobby our state legislators about the goals of our state AARP headquarters. This will be a fun trip and not arduous. We will be provided with free coffee and hopefully donuts and bagels on arrival plus a decent lunch. Our state lobbyists, such as Will Phillips will be there to inform and guide us. Please sign up at our next meeting on Wednesday the 28th of January. It is important to let our legislators know what our priorities are and that we will follow their votes during the session. I look forward to being your president and continuing the custom of conducting efficient meetings so that you will have plenty of time for coffee, snacks and pleasant conversations!

Emerging Technologies For Humanity

In our October 2007 newsletter I began a new series on "Emerging Technologies For Humanity" and presented information about the "Electronic Global Library." In our January 2008 issue I presented information about the world's shift to a "hydrogen economy" and how that shift would solve a long list of problems resulting from the oil economy while creating a cleaner and more productive society. This month's "emerging technology" discusses **Augmented Reality** and the author's statement that "Like many technologies, augmented reality holds both tremendous creative potential and a truly horrifying potential for abuse. Augmented reality can either enslave the world, or it can set it free."

Clearly, no civilization can uplift itself unless a significant proportion of its individuals have access to a quality education. The present educational environment on planet Earth is but a shadow of what it could be if aided by proper funding, political determination and new technologies.

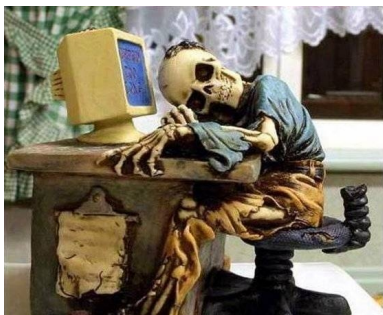

An emerging technology promises to radically enhance both the quality and "bandwidth" of educational processes. To understand how this works, however, we must first examine what's wrong with the current educational process.

What's Wrong With Today's Schools? Even our most modern, advanced educational institutions (universities) are frustratingly outmoded in terms of teaching students. The entire process of giving lectures, taking notes ...

(From The Internet)

*"I did what you told me. I sent the email to 10 people like you said. I'm still waiting for that miracle to happen. To all my friends who in the last year sent me best 'wishes', 'chain' letters, 'angel' letters or other promises of good luck if I forwarded something, **NONE OF THAT STUFF WORKED!** For 2009, could you please just send money, chocolate or gasoline vouchers. Thank You!"*

I'm Still Waiting!

Congratulations To America's Newest First Family!

President Barack Obama (44th President Of The United States Of America), First Lady Michelle Obama, Daughter Natasha "Sasha" Obama (Left) And Daughter Malia Ann Obama!
